

Next Hydrostatic Test Date Label Order Form

Free shipping on pre-paid orders! (excludes COD orders and orders shipping outside of the continental U.S.)

This is a simple label that can be affixed to any fire extinguisher or cylinder to indicate when the scheduled hydrostatic test is required. These can be placed on new extinguishers when they are originally placed in service or any time thereafter. The purpose of this label is to provide a quick indicator of the test date and eliminate the time spent in the field searching for the original cylinder manufacture date or the latest test stamp on a cylinder. This 3" x 1 3/8" label should be placed on the back of a fire extinguisher to comply with the requirements of NFPA 10.
